

# Engineering to improve life

## THE COMPANY

NAMA SA covers the whole range of engineering topics, providing integrated solutions from the conceptual design up to the management of major development projects. NAMA's clients are Organisations, which prepare and implement infrastructure works in Greece and abroad.

The modern integrated design requires a multidisciplinary approach and efficient solutions. So, we encourage the adoption of the principle of "sustainable development", in conjunction with advanced solutions orientated to the needs of our clients. The wide range of topics that the company undertakes, facilitates the investigation of total solutions that cover all the aspects of a project, thus achieving the selection of the optimum "value for money" solution.

The company comprises of highly experienced scientists, with various backgrounds and areas of knowledge, thus covering a wide range of activities and services. Perception of all, is to encourage actions that strengthen corporate responsibility.

# NAMA
